January 23, 2018

Dear Parents,

Inside the bag you will find a Unit on Snowy Day Activities for the students in the ESSENTIAL LEARNING SKILLS program. The focus of this packet is to identify some snowy day activities that the children are interested in along with a few more activities. The activity packet is going to depend on your child and their level and what they are able to complete.

As you know we have Kindergarten, first and second grade in here. The activities are based on what each student is able to do. Some of the activities are writing one to two sentences, drawing a picture, cutting, pasting ABC Order, Beginning sounds, ending sounds, filling in the blank and completing sentences. You will complete what the child is able to complete at their level. I gave the children a number line to complete the math. They are all familiar with the number line.

If you have any questions, please email me at s.parent@schoolofwestfield.org so I can help you with the work if you need assistance.

Mrs. Parent
